

Dear Patients,

Tomorrow (25th September 2019) we will not have access to our computers as we will be switching to a different IT provider.

Therefore we will only be able to see patients who require an urgent on the day appointment as we will not be able to access your medical records. If you require an urgent appointment tomorrow please phone the surgery or come in to surgery at 8am. If you feel you need an appointment, but this can wait until Thursday please contact us as usual on Thursday. We would also ask that you please refrain from contacting the surgery tomorrow unless you require an urgent appointment as we will not be able to access any medical records unfortunately.

We apologise for any inconvenience this may cause and thank you for your co-operation. We will post further updates when we have access to the computer system again.

Many Thanks,

Bolton Community Practice
